DIGESTIVE SYSTEM

The journey of food

From mouth to waste

1

Mouth

Teeth chew the food. Saliva softens it.

2

Oesophagus

A tube that squeezes food down to the stomach.

3

Stomach

Churns food with juices to break it down.

4

Small intestine

Goodness from food passes into the blood.

5

Large intestine

Water is taken out. Waste is left.

6

Leaving the body

Waste leaves the body.
