DIGESTIVE SYSTEM

The journey of food

From mouth to waste

1 

Mouth

Teeth chew the food. Saliva softens it.

2 

Oesophagus

A tube that squeezes food down to the stomach.

3 

Stomach

Churns food with juices to break it down.

4 

Small intestine

Goodness from food passes into the blood.

5 

Large intestine

Water is taken out. Waste is left.

6 

Leaving the body

Waste leaves the body.
