THINK BEFORE YOU CLICK

Five rules for staying safe online

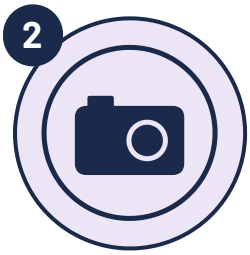

1

Keep it private

Never share your address, school or passwords.

2

Think before you post

Once it is online, it can be copied and shared.

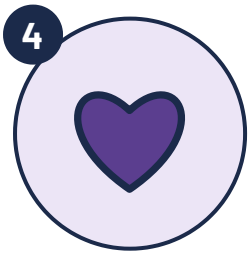

3

Check it is true

Ask who made it and why. Compare with other sources.

4

Be kind

Treat people online as you would in person.

5

Tell a trusted adult

If something worries you, tell someone. It is not your fault.
