LAB SAFETY

What to wear in the lab

The right kit helps protect you. Check what your task needs.

Eye protection

Goggles or safety glasses for splashes and sparks.

Lab coat

Fastened, to protect your skin and clothes.

Gloves

Matched to the chemicals you are handling.

Sensible shoes

Closed toes. No sandals or open shoes.

Hair and jewellery

Tie hair back and keep loose items away.

Know the eyewash

Find it, and the exits, before you start.
