How to use this template

A savings tracker keeps your goal in sight. Write down the target, then add each amount you put aside and colour in a square as you reach each step.

1. **Write your goal and target.** Add the amount you want to reach and the date you would like to get there.
2. **Divide the target by 20.** Each square on the chart is one twentieth of your target, which is also written on the page.
3. **Log every deposit.** Write the date and amount, then work out the running total.
4. **Colour a square for each step.** Colour one in whenever your running total passes the next step.

This tracker records your own figures. It is not financial advice. Free, impartial guidance on saving is available from MoneyHelper and GOV.UK.
